The Aircraft

N910VM is a 2017 Daher TBM 910, the newest aircraft in the Little Hawk fleet, hangared at Jet Aviation Scottsdale. The TBM 910 is among the fastest single-engine turboprops in production, cruising at up to 330 knots with turbine reliability and the runway performance to use smaller desert and mountain airports the airline network does not serve.

From Scottsdale, Las Vegas, Palm Springs and St George are about an hour away, and Aspen and Denver are under two.

Cabin & amenities

- Cream leather club seating for up to five, with fold-out work table
- High speed Starlink internet on every flight
- Full pressurization and large oval windows
- Garmin G1000 NXi flight deck; certified for flight into known icing
- Pets welcome; no lavatory on board

LITTLE HAWK LOGISTICS 434-825-4070 · eric@littlehawklogistics.com · littlehawklogistics.com

Little Hawk Logistics LLC is an air charter broker and the owner of the aircraft. It is not a direct air carrier and does not exercise operational control of any flight. Charter flights are operated by 45 North Flight, the direct air carrier, under FAA Air Carrier Certificate 9CCA698M, which holds sole operational control of every flight. Specifications are typical and subject to load, weather and runway conditions. Fact sheet current as of October 2026.
